EFS FEATURES & OPTIONS

MOLDED-IN ROD LOCKER: Molded-in rod lockers are standard equipment and provide safe, secure storage in the least amount of space.

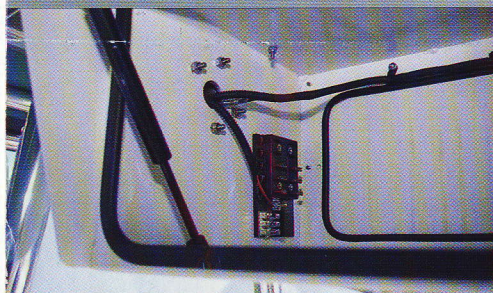

Every EFS model reflects an in-depth understanding of what the serious sportfisherman really wants and needs. And we've built those features into these boats as standard equipment, adding all the more value to each and every one. Some anglers, however, have even more specific or specialized needs...and we're pleased to accommodate them with an outstanding array of options. But no matter which model you choose—or how it's equipped—you can't buy a better boat than a Wahoo!

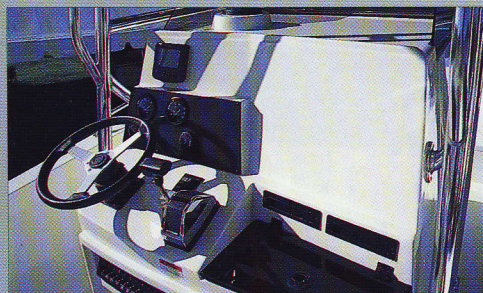

BOARDING LADDER: Taking time out for a swim is always an option, but this molded-in boarding ladder is standard.

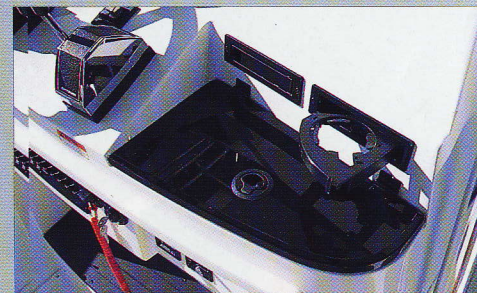

FOLDING REAR SEAT WITH STAINLESS GRAB RAILS: An optional folding rear seat with stainless grab rails gives you easy access to the pump mounted below the cushion.

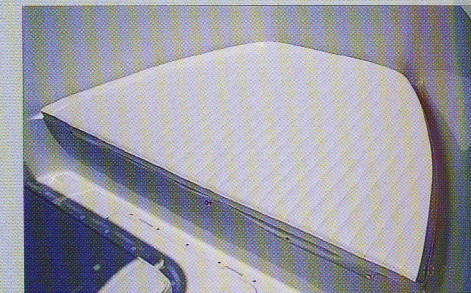

ELECTRONICS BOX WITH QUICKRIG STRIP: The optional electronics box with its own terminal strip gives you easy access to vital information at all times.

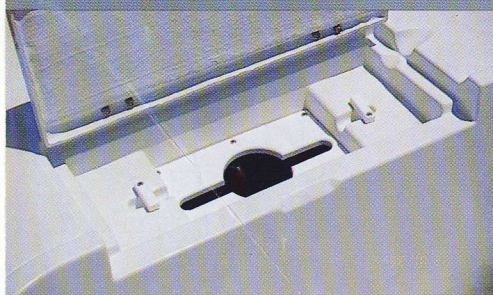

NEW CONSOLE DESIGN: A new console, standard on 24' and 26' models, provides ample room for custom electronics installation.

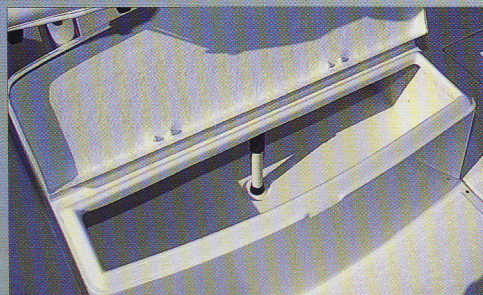

GLOVEBOX WITH DRINK HOLDERS: Keep small items together and within easy reach inside the standard glovebox with drink holders.

REMOVABLE FRONT DECK CUSHION: The removable front deck cushion is an optional way to take people along for the ride who just like to soak up rays.

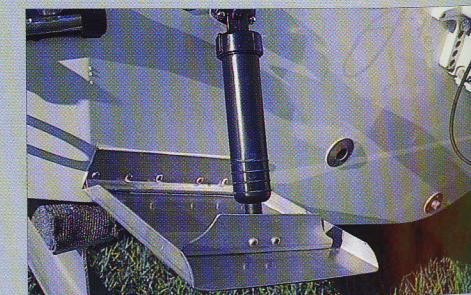

ANCHOR STORAGE AND ROPE LOCKER: The integrated anchor storage and rope locker are neatly out of the way and come standard on all EFS models.

AERATED LIVEWELL: Standard aerated livewells are large, easy to get to, and easy to keep clean.

REMOTE OIL FILL IN REAR SEAT: A remote oil fill located in the rear seat is a standard convenience on all EFS models.

OPTIONAL TRIM TABS: Optional trim tabs help keep you running smooth with maximum efficiency at all times.
